# INTRODUCTION

## ABOUT

shum is a jewelry brand founded in 2021 by Pedro Dias and Helena Vreeburg. The brand is committed to exploring new concepts in jewelry while creating a marked for the metrosexual men, the man who is not afraid to show himself, and cares about his looks, style and how he is perceived.

shum jewelry is for the guy who has clearly taken himself as his own love object and pleasure as his sexual preference. Pieces with the right amount of style,

“The typical metrosexual is a young man with money to spend, living in or within easy reach of a metropolis – because that’s where all the best shops, clubs, gyms and hairdressers are. He might be officially gay, straight or bisexual, but this is utterly immaterial because he has clearly taken himself as his own love object and pleasure as his sexual preference.”

# Corporate Logo and Corporate Trademarks

## Logo Introduction

Our logo is the key building block of our identity. The primary visual element that identifies us. The signature is our company name, with sometimes "Jewelry" underneath it.

### The Full Logotype

shum jewelry Masterbrand or Corporate Logo comprises two elements, the logo symbol and logo type. The Logo Symbol is a powerful image evoking the culture of design services – the connection between the strength of communication and the different points that influence.

It has a particular relationship with the Pedro Jesus name. The Logo Type has been carefully chosen for its modern and yet refined, highly legible style, which has been further enhanced by the use of upper-case

letters. The typeface is Montserrat Purism and has also been chosen to compliment and balance perfectly with the logo symbol.

The corporate logo is presented through the use of colour as well as shape and form. The two corporate colours are Yellow and Grey. It's a fresh and appealing blend of colours chosen for their strong combination – modern – classic – timeless. The colours have been selected according to international standards as shown below and are easily implemented.

**Recommended Formats are:**

.eps | .ai | .jpg | .tiff | .png

### Attention:

Use of any stylized, animated, hand drawn or other versions of an unofficial logo is not permitted. This undermines the logo system and brand consistency. Please consult with the Shum Jewelry Trademark Licensing if you have any questions or need further help.

# Logo Construction, Clearspace and computation

It is important to keep corporate marks or message can be positioned in relation to the mark. Of the symbol itself clear of any other graphic elements. To regulate this, an exclusion zone has and our company name – they have a been established around the corporate fixed relationship that should never be mark. This exclusion zone indicates changed in any way. the closest any other graphic element

## Clearspace:

### Definition:

Whenever you use the logo, it should be surrounded with clear space to ensure its visibility and impact. No graphic elements of any kind should invade this zone.

### Computation:

To work out the Clearspace take the height of the logo and divide it in half. (Clearspace = height /2)

## Incorrect Logo Application:

- Do not invert the logo symbol
- Do not alter the logo type style
- Do not change the size relationship between the logo symbol and logo type.
- Never change the proportions of the logo vertically or horizontally or alter the appearance in any way
- Do not alter the color of the logo

# The Corporate Fonts and Typography Guidelines

Typography plays an important role in communicating an overall tone and quality. Careful use of typography reinforces our personality and ensures clarity and harmony in all shum jewelry communications. We have selected a font which helps inject energy and enthusiasm into the entire shum jewelry communications, as the primary and secondary corporate typefaces.

### Primary Font

Designer: Max Miedinger

Helvetica is a neo-grotesque design, one influenced by the famous 19th century (1890s) typeface Akzidenz-Grotesk and other German and Swiss designs. Its use became a hallmark of the International Typographic Style that emerged from the work of Swiss designers in the 1950s and '60s, becoming one of the most popular typefaces of the mid-20th century. Over the years, a wide range of variants have been released in different weights, widths, and sizes, as well as matching designs for a range of non-Latin alphabets. Notable features of Helvetica as originally designed include a high x-height, the termination of strokes on horizontal or vertical lines and an unusually tight spacing between letters, which combine to give it a dense, solid appearance.

# Corporate Typography and Text Hierarchy

Typographic hierarchy is another form of visual hierarchy, a sub-hierarchy present in an overall design project. Typographic hierarchy presents lettering so that the most important words are displayed with the most impact so users

can scan text for key information. Typographic hierarchy creates contrast between elements. There are a variety of ways you can create a sense of hierarchy. Here are some of the most common techniques for shum jewelry layouts.

# The Primary Colour System and Colour Codes

Colour plays an important role in the shum jewelry corporate identity program. The colours below are recommendations for various media. A palette of primary colors has been developed, which comprise the 'One Voice' colour scheme. Consistent use of these colors will contribute to the cohesive and harmonious look of the shum jewelry identity across all relevant media. Check with your designer or printer when using the corporate colours that they will always be consistent.

### A4 Vertical Grid System Examples

### Grid System Explanation

In Graphic design, a grid is a structure made up of a series of intersecting straight (vertical, horizontal, and diagonal) or curved guidelines used to structure content. The grid serves as an armature on which a designer can organize graphic elements (images, glyphs, paragraphs) in a rational, easy to absorb manner.

A grid can be used to organize graphic elements in relation to a page, to other graphic elements on the page, or relation to other parts of the same graphic element or shape.
